

DR. TROKHAN'S PRE-OP TESTING GUIDELINES

- 
- ASA Class 1** No organic, physiologic, biochemical, or psychiatric disturbance.
- ASA Class 2** Mild to moderate systemic disturbance that may or may not be related to the reason for surgery
Examples: Heart disease that only slightly limits physical activity, essential hypertension, diabetes mellitus, anemia, EXTREMES of age, morbid obesity, chronic bronchitis
- ASA Class 3** Severe systemic disturbance that may or may not be related to the reason for surgery, (does limit activity)
Examples: Heart disease that limits activity, poorly controlled essential hypertension, diabetes mellitus with vascular complications, chronic pulmonary disease that limits activity, angina pectoris, history of prior myocardial infarction
- ASA Class 4** Severe systemic disturbance that is life-threatening with or without surgery
Examples: Congestive heart failure, persistent angina pectoris, advanced pulmonary, renal, or hepatic dysfunction

Minimum Laboratory/Test Requirements

Minimum laboratory/test requirements are defined by patient grouping based on American Society of Anesthesiology Classification as follows:

Class 1 patient less than 40 years old:

Hgb, Urinalysis for glucose, protein, ketones, and blood.

Class 1 patient between 40 - 65 years old:

Above tests PLUS BUN, creatinine, glucose, and EKG*

Class 2, 3, 4 patients OR any patient over 65 years old:

CBC, Urinalysis, SMA, EKG*

*Please provide photocopies of EKGs to allow the anesthesiologist to make comparison should it become necessary (i.e. please do not just comment "EKG normal").
